## 4 Impact

with unique absorption cascade for best protection and longest lifetime at the toughest loads!

## 4 Impact

- S-M-L absorption cascade for a wide torque range (e.g. PH1 – PH3).
- Synchronized torsion-zones are sequentially triggered at increasing torque impulses and absorb torque peaks.
- Additional 4th absorption step when used with Felo Impact bits.
- Specially developed to be used with tangential impact drivers.
- With bit retaining ring.

- selected high performance steels • optimized geometry • customized production

**TORSION** The high performance bit • absorbs torque peaks  
 • substantially extends tool life • reduces contact pressure

#### Hard screw joint

##### Problem:

The sudden torque peak occurring when the screw head hits the surface of the work piece can damage screw and bit.

##### Solution:

Felo TORSION bits absorb torque peaks and effectively prevent damage.

#### Soft screw joint

e.g. fastening screws into wood, with torque steadily increasing along the way.

##### Extra advantage:

Especially wear-resistant profiles increase life span of the bits.
