Screwdriver Handle Conforms to User's Hand

Bondhus Corporation, through its' German marketing partner - **FELO**, introduces an expansion of its' revolutionary line of Ergonic screwdrivers to include a complete line of screwdrivers with round shafts and precision black tips. Ergonic screwdrivers feature a space-age handle that actually conforms to the tool user's hand. Pressure points are eliminated making the screwdriver more comfortable to use. Less force is needed to grip the handle so more force can be directed to turning the screw head. Each screwdriver blade is machined to exacting German standards, and the result is a screwdriver that delivers fantastic performance and lasts virtually forever. A wide selection of screwdrivers are available in standard, flexible shaft and insulated versions.

FELO is a world leader in the development and manufacturing of high quality screwdrivers. **FELO** products can be ordered from Bondhus distributors all across the USA. For a listing of stocking distributors near you, visit the Bondhus website at www.bondhus.com.

Bondhus Corporation manufactures and distributes innovative, high quality, time-saving tools for use in industrial, electronics, automotive, hobby and machine tool industries.
