**Torx Plus® Blades Added to Line of Torque Limiting Screwdrivers**

Bondhus has added blades with Torx Plus® tips to its line of torque limiting screwdrivers. These new Torx Plus® blades are available in sizes from IP5 through IP15. These "ClickSet™" screwdrivers offer an economical solution to the problem of stripped screws and damaged carbide inserts. The screwdriver handles are available in ten standard pre-set torque levels ranging from 4.4 in lbs. (0.5Nm) to 31.0 in lbs. (3.5Nm). Interchangeable blades covering sizes T5 to T15, 1.5mm to 3mm, .050" to 1/8", a magnetic bit holder and now IP5 to IP15, allow the tool user to custom match the desired torque limiting level with the tool tip. When the pre-set torque level is reached, the mechanism slips and makes an audible "click". All Bondhus ClickSet™ tools have a lifetime warranty. ClickSet™ blades are manufactured from Bondhus' exclusive Protanium® steel which makes each tool up to 20% stronger than competitor tools.

Bondhus Corporation manufactures and distributes innovative, high quality, time-saving tools for use in industrial, electronics, automotive, hobby and machine tool industries.
