**Bondhus Introduces Improved Line Of HandyHex™ Handles**

BONDHUS is pleased to announce the addition of a line of hollow hex handles that allow adjustment of the distance a hex blade extends from the handle. The handle allows the user to infinitely adjust the distance the blade extends from the handle because the hole in the handle extends all the way through the handle. The handle will also accept the long or short arms of a hex wrench and act as a handle for the hex wrench. A thumb screw located conveniently at the front of the handle can be tightened to hold the blade or hex wrench solidly in position.

All Bondhus HandyHex™ tools are made from Bondhus' exclusive Protanium® steel, which makes them up to 20% stronger than competitors' tools. All Bondhus HandyHex™ tools carry a lifetime warranty and feature Bondhus' proprietary ProGuard™ finish, which offers five times more corrosion protection when compared to competitor finishes.

Bondhus Corporation manufactures and distributes innovative, high quality, time-saving tools for use in industrial, electronics, automotive, hobby and machine tool industries.

For more information on other innovative tools, visit our web site at
