

6200 wall

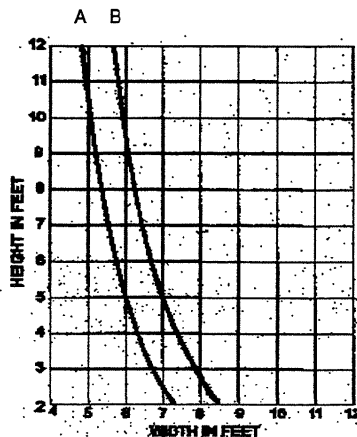

DEADLOAD CHARTS

Horizontal or deadload limitations are based upon the maximum allowable deflection (as listed) at the center of an intermediate horizontal member. Calculations are based on 1" (1.00) insulated glass setting on two setting blocks positioned as listed.

A = .125 Deflection w/Setting
Blocks @ 1/4 Pts.
B = .125 Deflection w/Setting
Blocks @ 1/8 Pts.
