

450 FG

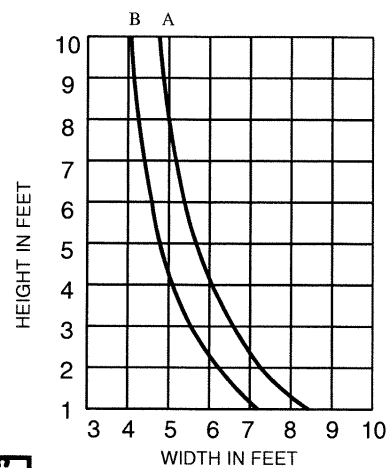

DEADLOAD CHARTS

Horizontal or deadload limitations are based upon the maximum allowable deflection (as listed) at the center of an intermediate horizontal member. Calculations are based on 1/4" (.250) thick glass setting on two setting blocks positioned as listed.

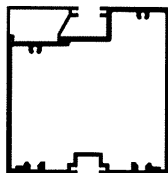

A = .125 Deflection w/Setting
Blocks @ 1/8 Pts.
B = .125 Deflection w/Setting
Blocks @ 1/4 Pts.
