

## County Courthouse with Class

Heartland Glass recently partnered with **Contegritty Group** of Little Falls on the newly remodeled Hubbard County Courthouse in Park Rapids, MN. The scope of the project included a new four level addition totaling 7,000 square feet plus major remodeling on most of the existing 28,000 square feet.

*Impressive new south-side entrance of the Hubbard County Courthouse.*

Heartland project manager, Garrity Gerber, headed up what ended up being a carefully staged 16-month project in order to allow for the facility to stay fully functional and occupied during the renovation.

*"We constructed a 6-1/2 foot storefront with tinted low-e glass," Garrity said, "The upper windows have sun shades and the interior had a glass railing overlooking the lobby. The first and second floors have glass panels above the countertop and the glass over the counters was all measured precisely to fit perfectly."*
