The Contec® HELP System™

HIGH

Products designed primarily to clean areas or surfaces that are high (e.g. walls, ceilings, fans, vents, ducts etc.)

EVERYWHERE

Products designed to clean areas and surfaces in-between and everywhere (e.g. counter tops, tabletops, electronic screens, etc.)

LOW

Products designed primarily to clean areas or surfaces that are low (e.g. floors, baseboards, etc.)

PARTS &
ACCESSORIES

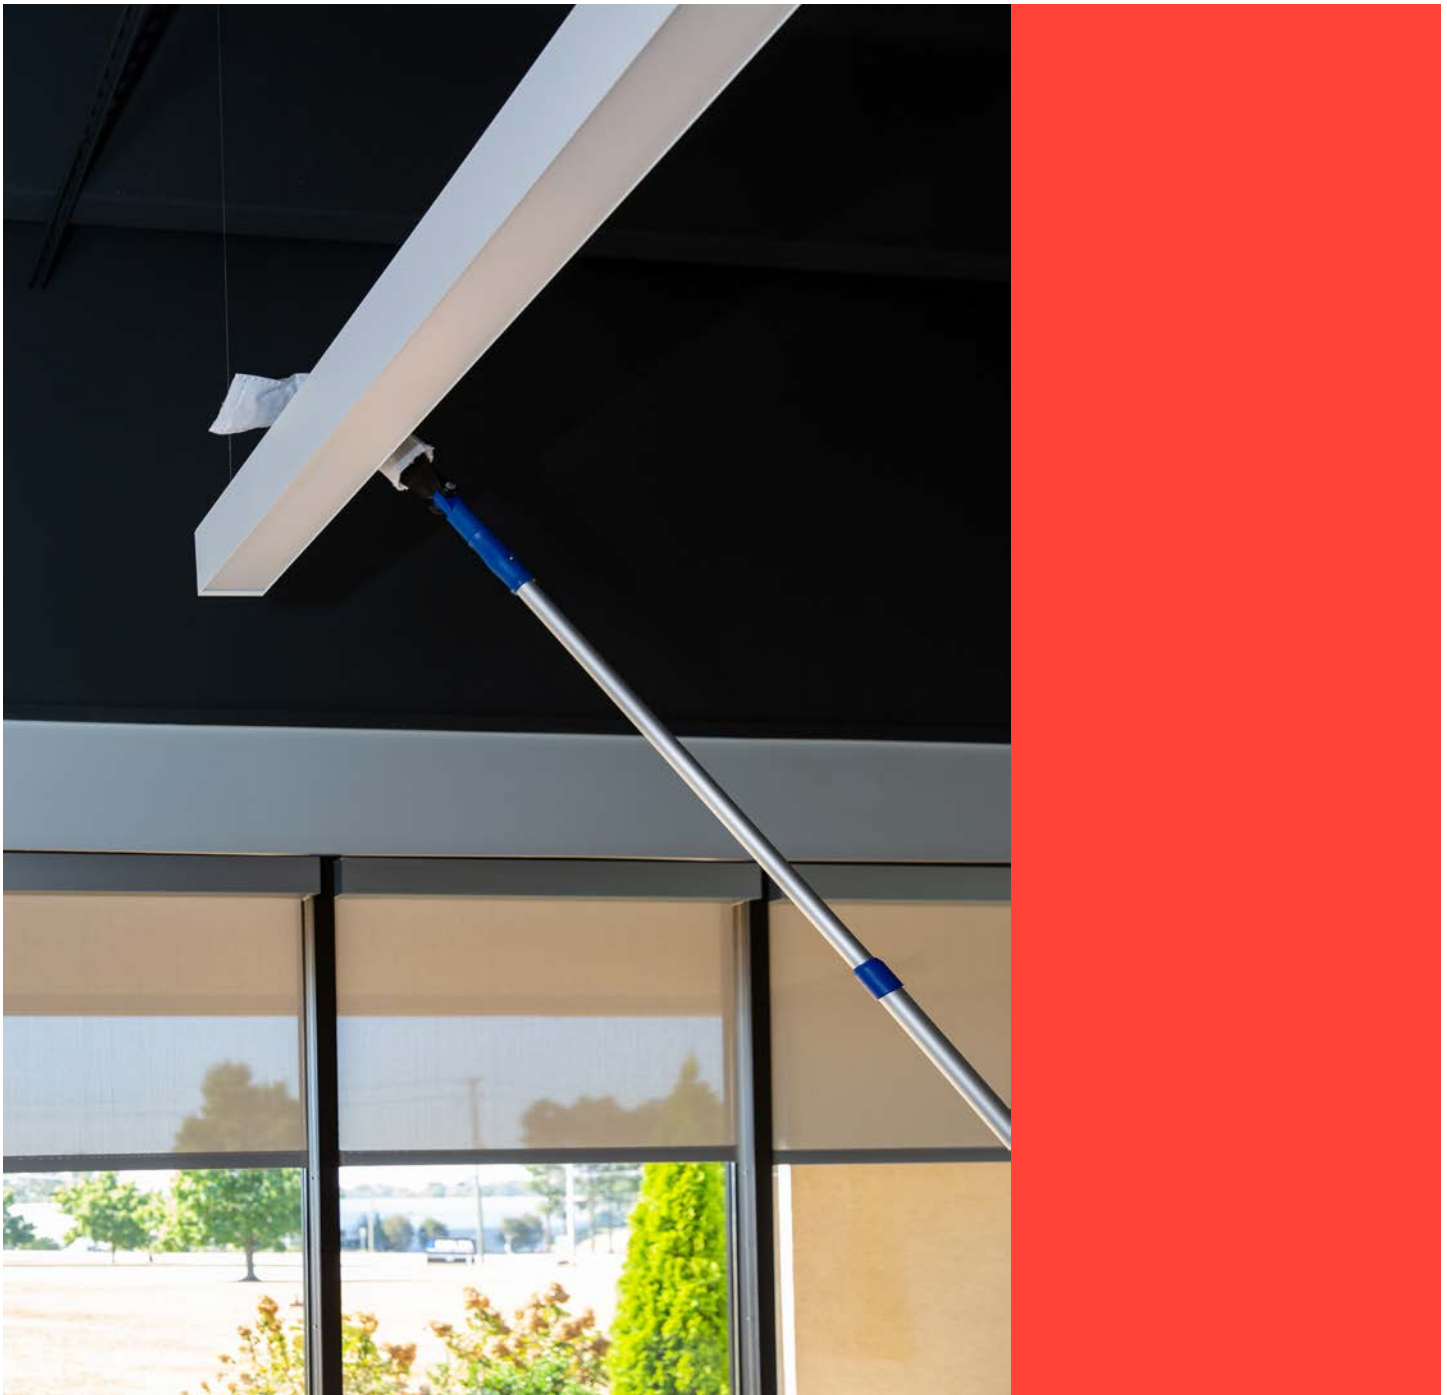

Parts and accessories designed to make cleaning more accessible, easier and efficient

HIGH

Products designed primarily to remove dirt and debris from areas or surfaces that are high or hard-to-reach (e.g. ceilings, light fixtures, ceiling fans, vents, walls, conduits, etc.)

description	image	size	part no.	packaging

Polypropylene Sieve - Blue autoclavable		Not applicable	2738	1 sieve/case

Why Add Bacteria to Your Bucket?

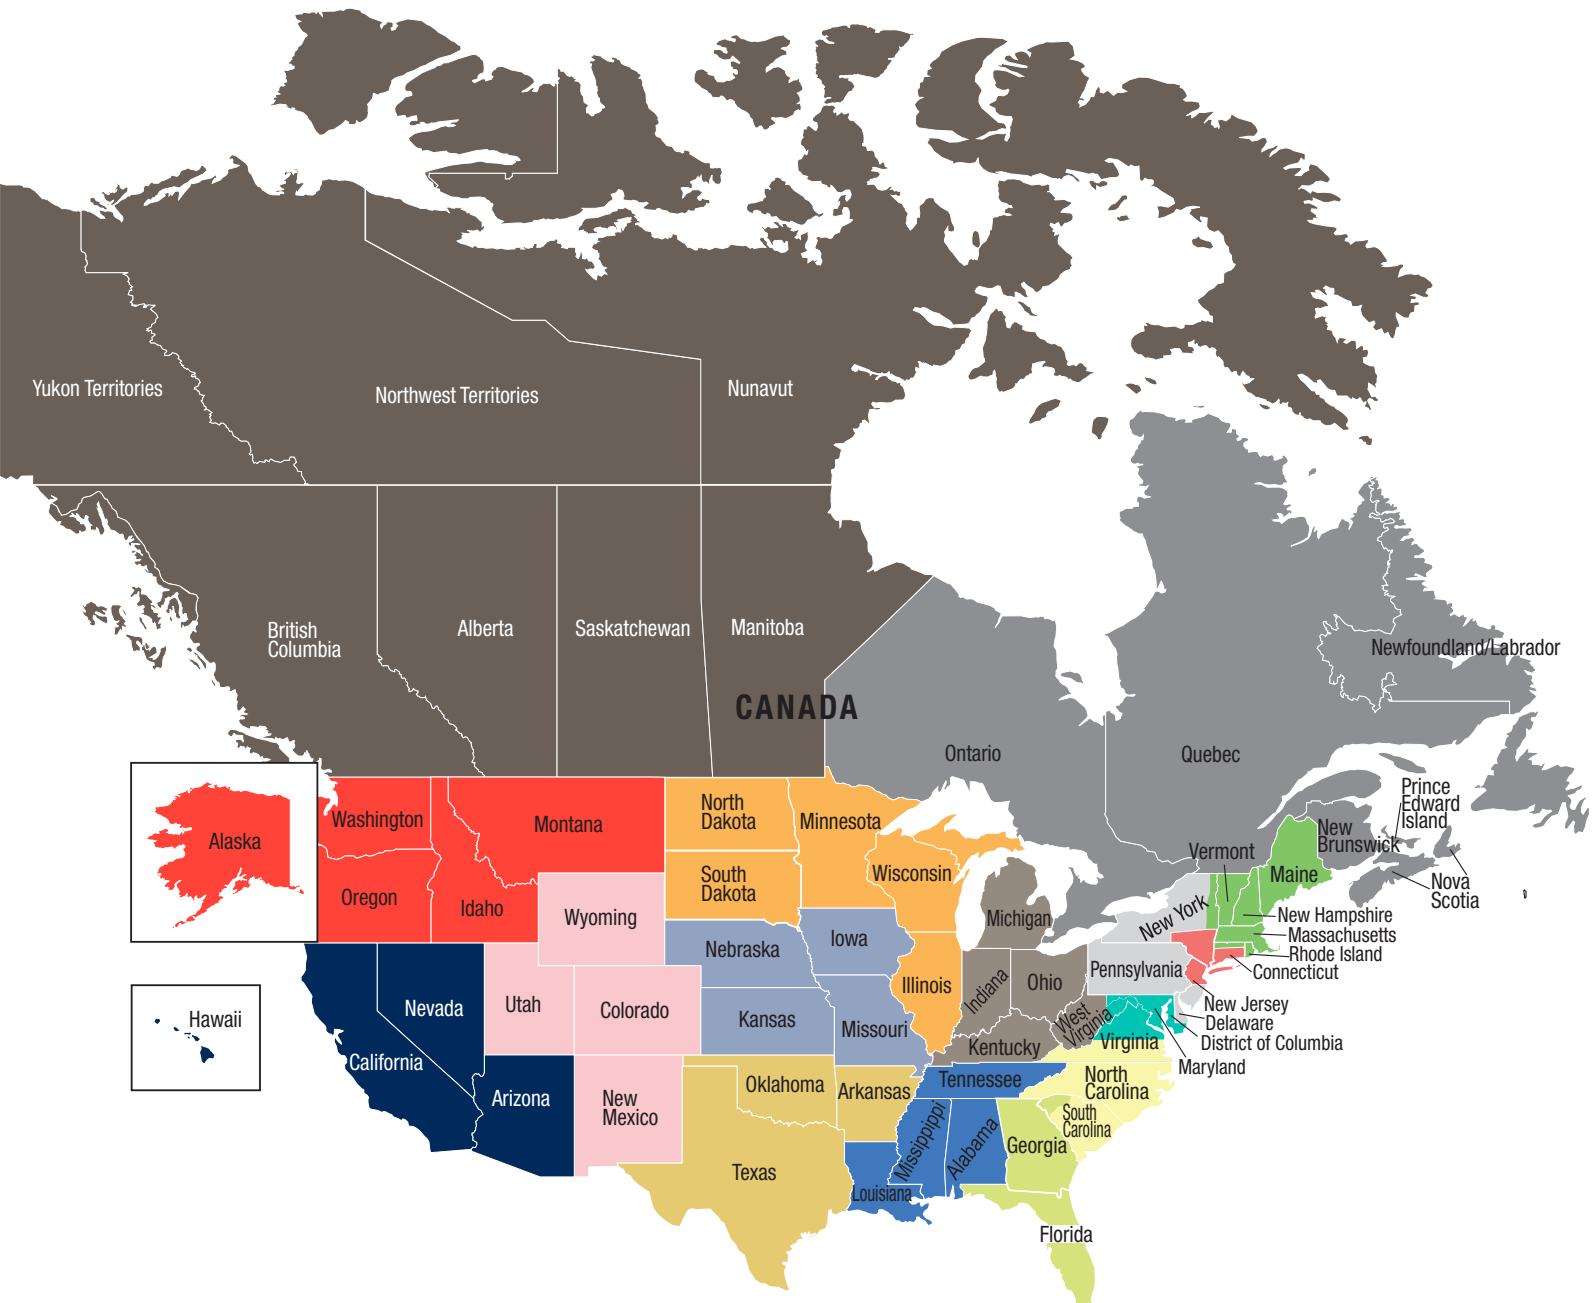

One mop is as good as any other, right? Not exactly. The truth is that microfiber works best the first time it's used. After that, it's just a magnet for nasties. Why? Because microfiber, while great at grabbing up bioburden from floors or surfaces, is terrible at letting go—even when washed. So why take on that risk with tonight's facility cleaning?

Laundry-Free™ Premira® Microfiber Pads are revolutionary. You get brand new microfiber every time, because our products are laundry-free! You also get superior particulate removal and liquid sorbtion every time, because *Laundry-Free™* Premira® Microfiber products are single use. And because *Laundry-Free™* Premira® Microfiber Pads are white in color, you can actually see the dirt and debris you're moving, unlike those fuzzy, graying mops sitting in your laundry bins.

So simplify your cleaning life! Reduce logistical headaches, Purchasing Managers and get cleaner work environments, Facility Managers! The *Laundry-Free™* Revolution is here!
