

Spalon Montage

WOODBURY, MN

Spalon Montage is a full-service salon offering hair, nail, skin, and body care services at three convenient locations in the Twin Cities, Woodbury, Chanhassen and Edina since 1991. You can trust the highly motivated team of honest and innovative salon and spa professionals who are dedicated to providing a personally rejuvenating experience for their guests. www.spalon.com

Spalon has a full service laundry to assure that guests have the finest, brilliantly clean linens and terry during their visit. The laundry equipment includes Milnor® washers, Huebsch® dryers and a Chicago® ironer. Spalon uses Pariser laundry chemicals supported locally by SoapTech.

Water Conservation for On-Premise Laundries

Milnor's 60 lb. capacity washer-extractors feature RinSave® water conservation technology standard

Current economic conditions have forced healthcare facilities to focus on operating costs, particularly back-of-the-house operations – including the on-premise laundry, according to healthcare operators.

This innovative process called RinSave® eliminates up to two high level rinses (.33 gallons per pound processed) and up to 10 minutes in the wash formula. It saves labor, water, sewer and electricity which are the largest direct operating expenses in the laundry. RinSave® conserves water, further substantiates your facility's green program and is infinitely sustainable, without further investment.

The finest in automated laundry feeders, ironers, folders and small piece folders are made in and by CHICAGO

New R&B Wire RBSP-1000 Laundry Floor Scale, List \$2,607, special \$2,500 FOB MCC.

Service Tips By Ed

Overloading Dryers Can Cause Damage

Overloading a dryer will cause damage and premature wear to trunnion and bearings as well as wear on belts and motors. Overloading is counter productive as an overloaded dryer does not dry properly or quickly. Goods must tumble and separate, not roll in a ball, to dry quickly and evenly. Whirlpool-ADC and Huebsch-Alliance recommend filling a dryer to 1/2 to 2/3 capacity. That means it is best to split a 60# washer load into two loads for a 50 or 75 lb dryer.

The cost to replace a trunnion and bearing can reach \$2,000 with parts and labor. If a trunnion is not replaced promptly and the basket sags forward, it could rub on the cabinet and cause more damage. If you hear a noise, investigate and call us.

Other tips to assure proper drying: Use reversing for items that tangle such as sheets and comforters. Use non reverse for clothing, towels and pillow cases. Clean lint screens after every shift, at breaks and lunch as needed. Vacuum out top of dryer annually – burner section. Have ductwork to the outside cleaned annually. The company that cleans your facility's kitchen ductwork can clean dryer ducts.

Parts Ideas From Barb

WIRING HARNESSES

Unless you use a scrub board or a wringer washing machine to do your laundry, you have a wiring harness on your machines.

This set of wires and connectors are as essential as electricity. There are numerous distinctive harnesses and cables, all depending on the function and location of the machine.

There are ignition cables for the ignition module-thermistor, cables for thermistors and din connectors for water valves just to name a few. Moisture sensing dryers have a moisture sensing harness kit.

When any of these go bad it disrupts the communication with the part or the power to the machine.

Replacing the harness or cables are usually less expensive than replacing the part.

Always remember to turn off the machine before checking the ohms on your harness or cable.

Minnesota Chemical Co. Service and Repair

Photos from a recent MCC full install of a laundromat. Leveling legs are installed on dryers prior to setting into the dryer cabinet. Washers are placed on elevated concrete or metal bases and bolted securely.

Dryer Secondary Lint Filters

If you are having trouble with lint from your dryers on the outside of the building or roof where your dryers vent out, we have solutions. Secondary lint collectors by Energenics and Clean Cycle collect 90% of the lint that gets past your dryer lint screen. We have inline models installed in the ductwork, common lint filters for the dryer enclosure area and external filters. Some of these units come with overpressure alarms and fire suppression.

For further information call your Minnesota Chemical equipment salesman and he will be able to tell you which unit would work best in your laundry.
