SANKOSHA USA

Sankosha USA recently showcased its ST-9000U Press-Free Finisher at an open house in its Chicago headquarters. The ST-9000 allows for quality press-free finishing at 160-380 pieces per hour, depending on item type, material and the configuration of the finisher.

The ST-9000 features high productivity, high finishing quality, low energy consumption, flexible layout options to match factory floor plan, and no padding/covers to replace!

As the very first Sankosha dealer in the United States, Minnesota Chemical has been the most steadfast and proudest promoter and partner of Sankosha USA and its offerings. Sankosha's focus on customer needs, exceptional quality and reliability, and innovation in response to customer needs has long made it a market leader whose products Minnesota Chemical has been proud to promote, to sell, and to support long after the sale for 30 years. We look forward to the coming decades with Sankosha, as their innovative philosophy continues to improve and expand its offerings of industry-leading finishing equipment!

Please contact your Minnesota Chemical rep today for more information on how we can help improve your plant and profitability with new Sankosha equipment, or how we can help support you with your existing Sankosha equipment. Sankosha and Minnesota Chemical are here for you for the long-haul!

Parazyme by Pariser

HAVE YOU EVER walked into a kitchen or laundry and caught a terrible funky whiff?

PARAZYME by Pariser was designed for cleaning and treating kitchen drains and grease traps, however, it has proven to be an extraordinarily versatile enzyme product that also has proven effective in other applications, such as:

- SEPTIC TANKS
- LAUNDRY DRAINS
- KITCHEN SINKS
- GREASE TRAPS
- BATHROOM ODORS
- BATHROOM DRAINS
- PET STAINS
- DUMPSTERS
- TOILETS
- CARPET CLEANING

Contact your Minnesota Chemical Supply Sales Representative today to discuss how Parazyme may help you in your cleaning process!

Huebsch® Laundromat Machines Rise Above the Rest.

Industry-Leading Huebsch Vended Equipment

Be blown away by state-of-the-art Huebsch machines that exceed expectations. Our ultra-efficient equipment features intuitive technology, world-class durability and money-saving innovations to meet today's demands. Achieve a clean look to match immaculate results with Huebsch laundromat equipment, whether opening a new store or replacing machines.

Maximize Your Revenue

Boosting revenue is easier than ever with Huebsch laundromat equipment. Our commercial laundromat machines can withstand constant use without delays, breakdowns or repairs. More uptime means more money in your pocket—and less time dealing with unhappy customers. Optimize your returns from anywhere with an internet connection using Huebsch Command™. Huebsch offers financing with low, competitive rates to get started.

Easy Huebsch Financing

Whether you are considering a partial retool or a whole new laundromat, explore competitive financing options <https://huebsch.com/finance/promotions/>

Rinsave saves water and formula time by special speeds and saving 1 or 2 rinses. Miltouch is touchscreen programmer with laptop programmability – transfer formulas by USB stick.

New Dryers at MSRP

Huebsch HT055FN, Gas, 50#, Dual Digital Timers, Slimline, reversing, passes through 34.5" doorway, various voltages.....	\$6,697
<i>120#, 170#, and 200# dryers are available in reversing and with Galaxy Micro Control and OPT True Moisture Sensing Drying</i>	
Huebsch HT075FN, Gas, 75#, Dual Digital Timers, non reverse, various voltages.....	\$7,010
Huebsch HT075FN, Gas, 75#, Dual Digital Timers, reversing, various voltages.....	\$8,388
Huebsch HT075NN, Gas, 75#, Galaxy Micro Control, reversing, OPT True Moisture Sensing Drying various voltages.....	\$9,502

All Huebsch dryers (except electric heat) have available in the basket CARE fire suppression including remote connect for cold enclosures.

Other Huebsch dryers in sizes from 25# to 200#. And ask about stainless steel cylinder and panels. Ask about **ADC** and **CLM** dryers in large capacities.

MSRP is a good BUDGET estimate of final washer or dryer price after discount allowed, freight and delivery added back in. Your price could be less!

SPECIALS IN STOCK: New R&B Wire RBSP-1000 Laundry Floor Scale, List \$2,607, special \$2,500 FOB MCC.

MCC Service Tips

Commercial Laundry Equipment Maintenance Recommendations

1. Read Your Equipment Manual

This may seem like extremely basic advice, but the best information on your equipment is generally contained in its own manuals, and fewer people refer to their manuals than you might think. These manuals often reference the recommended PM schedule for that machine, its troubleshooting tips, and other guidance specific to your equipment. It is the best place to start. If you do not have a copy of your manuals, please reach out to Minnesota Chemical with the make, model, and serial number; we will likely have a copy.

2. Regularly and Proactively Inspect Your Equipment Rather Than Waiting for a Problem

Don't wait for a problem to show up; give all your commercial/industrial laundry equipment a good inspection at the beginning and end of a workday. The more regularly you inspect your machines, the more likely you'll spot an issue before it becomes a costly problem.

3. Stick to a Regular Maintenance Schedule

It can be easy to let regular maintenance tasks fall through the cracks. Letting that happen, however, can cost you a lot of money and downtime down the road. Having a regular maintenance schedule makes it easy to keep up with important to-do items, holds employees accountable, and keeps maintenance on track — even when time is at a premium.

4. Document Your Work

Having an ongoing record of your maintenance, repairs, issues, alerts, and errors not only allows you to keep better track of your equipment's performance and keep important maintenance tasks from being forgotten, it also will assist our service technicians when they are called out when you are unable to complete your own repairs, thus saving you money!

5. Clean the Lint Screen on Your Dryers Every Day

Lint buildup is a component of or the sole cause of most dryer fires. Clean the lint from the screen and lint compartment at least once or twice a day, and ideally after each use. This helps to maintain airflow, to prevent overheating of your commercial dryer, and to minimize the buildup of rogue lint.

6. Leave Washer Doors Open When Not in Use

Moisture and mildew are the bane of washers. Keeping the doors on your washer-extractors open allows proper airflow and helps to allow moisture to evaporate, preventing any mold or mildew from building up in the machines.

7. Keep Machines and the Surrounding Areas Clean

A clean OPL operation is more sanitary and pleasant to work in, but beyond that: frequently wiping down your machines, cleaning out the compartments, sweeping, and mopping can help prevent major issues and keep your machines running longer. Dirt and debris around your machines can be a fire hazard or get inside your machines and cause damage.

8. Make Use of Your Local Manufacturer and Service Support

Minnesota Chemical and our trusted vendors are here to help you. Today's commercial laundry equipment is more advanced than ever. Any issues dealing with control panels or electrical components can be especially tricky if you're not specially trained. With that in mind, it's better to be safe than sorry. If you're ever unsure about how to fix something, don't hesitate to contact Minnesota Chemical—we will help you get to the right solution whether by phone or via a service visit.

Please contact MCC service anytime M-F during regular hours with your service questions at 651-288-4857 or service@minnesotachemical.com.

Parts Ideas From Barb

We Stock Valves!

If you call and ask for a valve, I will ask you the following questions. Is this a brass valve or plastic? Do you know the brand name of the valve? I need to know this because the factories change the brand of the valves often. Do you know what size the valve is? Is this a steam, water, air or a gas valve?

We have on hand Burkert-Parker-Hays-Magnatrol-Whirlpool-Dan Foss-United Brass-Mueller-Elbi valves and more. There are many different options to choose from. We conveniently have mixing valves-water valves-check valves-spring valves-gas valves-air valves-and manifold valves. Steam valves to vent valves. We have brass and plastic duo valves. Some of these valves are used on Huebsch-Milnor-Alliance-Unimac-Cissell and American Dryer machines. Call me to order the valve you need.

Fun fact: The world's tallest Christmas tree ever displayed was in Seattle, Washington, at the Northgate Shopping Center in 1950. The Douglas Fir stood at a whopping 221 feet and was decorated with around 4,594 lights!

Bruce Edwards Retires

Minnesota Chemical's longtime Shipping Department Manager, Bruce Edwards, recently has retired. Bruce's can-do attitude, reliability, and commitment to getting Minnesota Chemical customers the products they need when they need them were well-known.

Fun fact: Bruce attended the original Woodstock as a teenager, and, at his retirement party, he was presented with, among other things, various Woodstock recordings and a Woodstock poster signed by MCC staff and vendors. We will miss Bruce's great stories and infectious positive attitude.

We wish him well in his next chapter!
