

Our Suppliers

Milnor/ADC Dryers

Lance Surridge

Lance Surridge is our representative for Milnor/ADC dryers, now part of Whirlpool. Lance has been with the group for 13 years. He is knowledgeable, answers emails promptly and just gets things done.

Milnor/ADC Dryers are made in Fall River, MA and come in sizes from 30# to 400#. We have a dryer for all applications.

Minnesota Chemical People

Steven Byers is our newest staff member – Service Technician

I have experience in multiple types of industrial machinery as well as experience in HVAC, plumbing and commercial building maintenance. I am a veteran who was proud to serve in the Navy as an aircraft electrician working on FA-18 Hornets. I have called the northern suburbs home for the last 21 years with my wonderful wife and twin sons who are 19 years old, they have made me very happy and proud by pursuing higher education, and one is a member of the national guard. He recently completed boot camp and technical school as an honor graduate. I enjoy fixing and building things and giving back to my community in different forms of charity. I thank Minnesota Chemical for giving me the opportunity to provide for my family, community and most importantly a chance to serve our customers. This is all possible because of a positive attitude, hard work and a strange sense of humor. "Have fun no matter what you're doing".

Water Conservation for On-Premise Laundries

Milnor's 60 lb. capacity washer-extractors feature RinSave® water conservation technology standard

Current economic conditions have forced healthcare facilities to focus on operating costs, particularly back-of-the-house operations – including the on-premise laundry, according to healthcare operators.

This innovative process called RinSave® eliminates up to two high level rinses (.33 gallons per pound processed) and up to 10 minutes in the wash formula. It saves labor, water, sewer and electricity which are the largest direct operating expenses in the laundry. RinSave® conserves water, further substantiates your facility's green program and is infinitely sustainable, without further investment.

Coin Laundry

Galaxy Controls for Huebsch® Washer Extractors

MAXIMUM REVENUE

OPTIMIZE EFFICIENCY

EASY TO USE

Huebsch Galaxy, vended laundry's most innovative control system, brilliantly combines advanced features and intuitive operation to deliver laundromat revenue unlike anything else in the industry. And with the support of Huebsch Command™, you can put all these amazing features to work for you anywhere there's an internet connection.

- Multi-Level Vend Pricing allows you to charge extra for warm or hot water, resulting in improved profitability.
- Cycle Modifiers offer customers additional options and flexibility for their wash needs while bringing laundromat owners another powerful, revenue enhancing feature.
- Time-of-Day Pricing enables price variations throughout the day, helping you manage peak laundromat customer usage and compete for new customers.
- 24 Customizable Cycle Selections provide customers with options to optimize vended laundry machine wash results for various loads while creating added revenue opportunities for laundromat owners.

Aquanomic Low-Temp Laundry Program

Clean and white. Soft and fresh. You want the clean, white, soft and fresh results guests expect - the first time linens are laundered. The Aquanomic Low-Temp Laundry Program offers consistently superior results that delivers significant energy and water savings over traditional laundry programs, improving your bottom line. Whatever your laundry needs and challenges, Ecolab can offer a complete laundry solution that helps reduce rewash while extending the life of your linens.

Other Huebsch dryers in sizes from 25# to 200#. And ask about stainless steel cylinder and panels. Ask about **ADC** and **CLM** dryers in large capacities.

Service Tips By Ed

Dryers Not Heating

I have gotten a lot of calls lately on dryers not heating. I want to go over a few things to check when this happens.

1. Is there power to the dryer? If yes, does the control light up on the dryer display? Does the light on the ignition control

module light up? If there is power and lights are not on, ignition control module has failed.

2. If all above items are OK and you still have no heat, check to see if you are getting spark. If no spark, replace your high voltage lead wire. If you are getting spark then check to see if you're getting voltage to your gas valve. If you are and you just not getting gas then it's your gas valve or your pressure regulator.

3. If all of these check out, you should remove your burner tubes and clean them with warm water.

4. And a reminder, you should get your exhaust vents cleaned once a year for proper air flow. Make sure there is no bird screen on the exhaust outside the building – screen will clog! Clogged vents can lead to no heat because your airflow switch is not pulling in.

Remember I am just a phone call away for technical support at 651-288-4857

Parts Ideas from Barb

Identify your Part

Sometimes trying to find a part number is like looking for a needle in a haystack.

Here are some helpful hints:

- First and foremost check the parts manual. If you do not have one, I can help you depending on the age of the machine.
- When you look at the part, see if there is a label. P/N usually represents a part number
- If you are uncertain of the name of the part, see if you can find what is next to it.
- What is the function of this part? What does this part connect to?
- Color, shape and size can be helpful as well.
- With the washer or dryer model and serial number and often voltage, we can assure that we get you the correct part.
- When in doubt send a picture to parts@minnesotachemical.com.

Made In Chicago!

Air Chicago Elite small piece towel, gown, pad folder.

- Streamlined CHI.
- Touch PC-based full color touch screen control system for operation, custom product programming, management, and graphical diagnostics.
- Convenient USB for saving programs for extra security.
- Primary folding may be bypassed for direct crossfolding of items such as bath mats or surgical pants – up to 12" (300mm) wide.
- Newly designed pneumatically-controlled ski width adjustment provides fast and accurate positioning with fewer moving parts.
- Stain/tear reject button discharges rejected items separately.
- Crossfolds items once or twice into halves, thirds, or quarters. Inverter-controlled second crossfold reversing conveyor for crisper, more accurate folds.
- Retractable discharge system maintains stack integrity throughout transition to the delivery conveyor.
