Our Customers – Our Vendors – Our Free Falls Shows

Thanks for coming to shows in Menomonie Falls, WI and Shoreview, MN

Super Saver

Milnor's 60 lb. capacity model 30022 VRJ provides three ways to save: time, energy and water. That's good for our environment. And great for you.

Milnor's E-P Plus® controller has pre-programmed wash formulas built right in to save you time. You can modify formulas or create and save up to 30 of your own. Our extra-large cylinder perforation means linens end the cycle retaining less moisture, speeding up dryer times to save energy. Save water with **Milnor's RinSave® Water Saver technology**. The VRJ can even fit through a standard 3'-0" door, which simplifies installation and saves space. That's even more savings. Super!

RinSave® MILNOR Made in USA

ECOLAB® AQUANOMIC™

Aquanomic Low-Temp Laundry Program

Clean and white. Soft and fresh. You want the clean, white, soft and fresh results guests expect - the first time linens are laundered. The Aquanomic Low-Temp Laundry Program offers consistently superior results that delivers significant energy and water savings over traditional laundry programs, improving your bottom line. Whatever your laundry needs and challenges, Ecolab can offer a complete laundry solution that helps reduce rewash while extending the life of your linens.

Good Bye Jim Garcia – Again!

Jim Garcia has held just about every position at MCC. We made him President for a day when he retired in 2017.

He came back to help out and we loved having him back. So we said goodbye again and send him packing with a red travel bag

Left to Right Bill Kim, Pat Reed, Jim Garcia and Anita Skinner

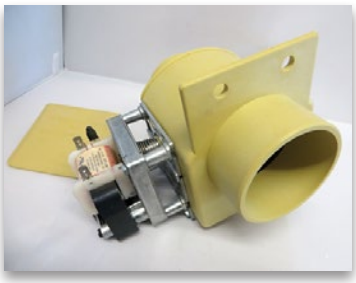
Other Huebsch dryers in sizes from 25# to 200#. And ask about stainless steel cylinder and panels. Ask about **ADC** and **CLM** dryers in large capacities.

Service Tips By Ed

Drain Valve Problems

Most Huebsch and Milnor washers use a Dependo Brand normally open drain valve.

This valve powers closed when the washer had power. When it is time to drain the machine takes power off the drain valve motor and a spring opens the valve allowing water to flow out by gravity. So if the machine loses power, the washer will empty.



Drain Valve stuck open or some water leaking out during cycle: Check voltage; check ball valve for debris caught in drain valve; clean the drain valve; check seal or replace drain valve; check for blockages in drain after drain valve. Be sure drain valve is not hard plumbed to final drain pipe or trough as it is an item that needs service.

Drain valve stuck closed: Check voltage; clean the ball valve; clean drain hose or replace drain valve.

Drain error: Run control through diagnostics; check drain hoses; check drain valve or replace drain valve.

MCC Holiday Schedule:

Closed December 24, 25 and 31.

Best wishes to all for a joyous Holiday Season and prosperous New Year.
