

## Our Customers

### The Grand Hotel Minot, ND

The Grand Hotel is owned/operated in Minot and has been enriching the Minot community since 1963. The property boasts 225 spacious sleeping rooms and 17,000 square feet of meeting space; making it the Magic City's overall largest hotel. Tyler Meschke, Director of Engineering, and his staff take care of this well run facility. Tyler is Laundry Director as well. In March 2019 Grand Hotel changed out two older dryers for two Huebsch HT120 120# dryers with micro controls, OPT true moisture sensing and reversing. The dryers work very well and save time, labor and utilities as the dryers themselves pace the dry time – they terminate drying, go to cool down then signal the operator when the load is dry.

## Super Saver

Milnor's 60 lb. capacity model 30022 VRJ provides three ways to save: **time**, **energy** and **water**. That's good for our environment. And great for you.

Milnor's E-P Plus® controller has pre-programmed wash formulas built right in to save you time. You can modify formulas or create and save up to 30 of your own. Our extra-large cylinder perforation means linens end the cycle retaining less moisture, speeding up dryer times to save energy. Save water with **Milnor's RinSave® Water Saver technology**. The VRJ can even fit through a standard 3'-0" door, which simplifies installation and saves space. That's even more savings. Super!

Other Huebsch dryers in sizes from 25# to 200#. And ask about stainless steel cylinder and panels. Ask about **ADC** and **CLM** dryers in large capacities.

## Service Tips By Ed

### Milnor EP Plus and EP Express Test Mode

Milnor washers with EP Plus and EP Express controllers have a built in test mode. Test

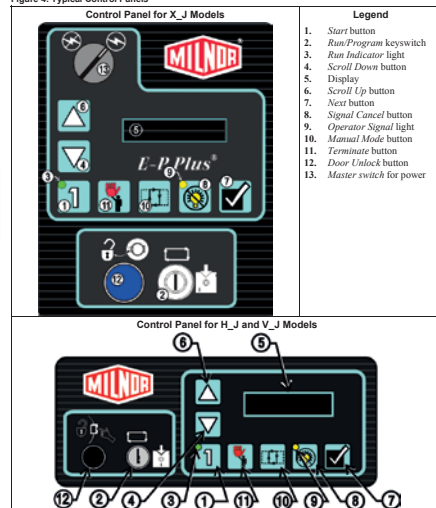

Mode is used to check inputs for various parts and machine operations including water levels.

Close the washer door. On the EP Plus and EP Express press the square with arrows going around it, then press the up arrow to #3 **test outputs** then press the square and the #1 button at the same time. This puts you in test mode. Press the up arrow until you find what you want to test. Press the 1 twice and that will activate what you are testing. To turn off you press the 1 again. In test mode, you can test hot and cold-water valves, flush valve, high and low water levels, high speed extract, reversing bath and drain valve. Maintenance staff can check a variety of problems with a washer. When you finish your tests press the red hand to leave test mode. Then wait for the screen to advise **ready to run formula**.

Chapter 2. Programming

Figure 4: Typical Control Panels

#### 2.1.1. Control Functions During Normal Operation

Normal operation is the state of the machine when the machine control circuit is energized and the Run/Program keyswitch is in the Run position. The machine may be either idle (waiting to run a formula) or running. If the machine is idle, the message on the display will begin with "Run Formula" and include a formula number on the second line.

1. Press the Start button (1) to initiate the selected wash formula. The formula begins if power is available at the machine and the loading door is closed. When the Start button is held depressed
