

AUTOMOTIVE (USA)

WHEEL MANUFACTURING

Castrol Syntilo® 9913

ANNUAL SAVINGS: \$370,000

THE SITUATION

The coolant system had a long history of filter fouling and maintenance issues as well as the need for frequent tank side additives to control fungus, foaming and mist.

BEFORE CASTROL

- Filter backwash problems due to filter fouling
- Frequent downtime for filter maintenance and cleaning
- Quarterly dump and recharge schedule
- Tank side additions to control fungus, foaming and mist

AFTER CASTROL

- Improved system control and cleaner system operation
- Improved surface finish and part quality
- Longer coolant life
- Reduced maintenance and disposal costs

THE SOLUTION

- Use of Castrol Syntilo 9913 resulted in reduced downtime and increased production capacity, improved quality and reduced rejects.
- Reduced maintenance and waste treatment costs totalled \$370,000.

Castrol Syntilo 9913 resulted in longer coolant life, reduced downtime and improved wheel surface finish.
