

MITUTOYO LUNCH & LEARN

Hardness Testing, Measurlink Software/Data Management, CMM

Wednesday, October 17, 2018

10:30 am to 4:00 pm

LUNCH & LEARN

Experience the full capabilities of Mitutoyo's innovative hardness testing instruments and data collection software. Walter Wardzala, Mitutoyo hardness testing specialist, will discuss the different types of hardness tests, why they are important and how to perform hardness testing accurately. Jeremy Banks, Mitutoyo MeasurLink software and data management specialist, will explain why data collection is in demand in the manufacturing industry, as well as different ways to collect data. Peter Weber, Mitutoyo CMM sales engineer, will discuss the different types of CMMs available and their uses. Also included in the discussion will be various probe and sensor technologies that can be used on a CMM, including non-contact sensors.

Agenda

- 10:30 am – 10:45 am** Introductions
- 10:45 am – 11:45 am** Electronic Data Collection & Data Management – How & Why
- 11:45 am – 12:45 pm** **Complimentary lunch**
- 12:45 pm – 1:45 pm** Fundamentals of Hardness Testing & Why Check Hardness
- 2:00 pm – 3:00 pm** Matching a CMM to an Application
- 3:00 pm – 4:00 pm** Practical application workshop. Bring your parts with prints and have them measured.
